Special Bulletin #9: Visual Resources Association Computer Users Directory

Abstract
This directory is a compilation of information gathered in a survey of Visual Resources Association members in September 1995. There were 103 respondents who gave information about their computer systems. The directory listings are organized by platform, then alphabetically by the user's last name. Each entry lists user information; hardware, grouped together as configured at the institution, when appropriate; software; supplies; and access and services.

Keywords
directory, contact information, computers, computerization

INTRODUCTION

This directory is a compilation of information gathered in a survey of Visual Resources Association members in September 1995. There were 103 respondents who gave information about their computer systems. (A copy of the survey can be found in the Appendix.)

The directory listings are organized by platform, and then alphabetically by the user’s last name. There are indexes which give page references by selected hardware brands and database software brands, as well as user name and institution name and type.

Each entry lists user information; hardware, grouped together as configured at the institution, when appropriate; software; supplies; and access and services. Brackets are used for responses that do not note a specific brand name.
