BRITISH ARTISTS AUTHORITY LIST

Computerization of slide libraries and photo archives brought with it a need for authority lists which eliminate duplication of records due to different spellings of the same name. Other institutions expressed strong interest in our authority list of British artists, which led me to offer it to the Visual Resources Association for publication as a Special Bulletin. All of the proceeds will go to the VRA. The list should be understood as a working paper, which is growing and which is updated routinely. It is stored in our mainframe computer at Yale and is printed out only upon special request.

This authority list includes the names of 4,520 British artists or artists of other nationalities working in Great Britain from ca. 1500 until ca. 1945, culled from our database of 42,000 records, which constitutes the *Computerized Index of British Art*. The index was begun in 1977 and will grow indefinitely. The nationality for each artist is indicated below the artist's name. Artists whose nationalities are unknown are usually unverified, i.e., we were unable to trace them in any of our source literature. Memberships are included after the name in abbreviated form and a list of membership abbreviations is appended.

Artists' names and dates are verified against a number of reference works which we consult before the data is entered into our "biography" database. The list is included for reference. "Unverified artists" are specified with "(unv)" after the name.

Although a number of people have contributed to the list's upkeep, one person in particular, Kerry Sullivan, has seen it through to its present level of accuracy. Ms. Sullivan is now at the Frick Art Reference Library in New York. I am most grateful to her for completing this sometime tedious task in such an exemplary way. Additional assistance was provided by Annie Chrzanowski.

Since this is merely a hard copy of electronic data, we would appreciate any additions, corrections, or updates so that we can keep our artist biography file as up-to-date as possible.
